📍 Kolkata-700141, WB, India

ABOUT ME

Front-End Engineer combining operational strategy (MBA) with deep technical expertise in React.js, Next.js, and TypeScript. Skilled in advanced state management (Redux Toolkit, Zustand) and data fetching (Tanstack Query) to architect seamless, high-performance user experiences.

EDUCATION

Mahakaushal University Jabalpur | 2024 - 2026

Master in Business Administration - Operations Management

Focused on process optimization, strategic planning, and efficient workflow execution to drive business performance.

Swami Vivekanand University Sagar MP | 2021 - 2024

Bachelor of Computer Applications (BCA)

Secured a robust foundation in computer fundamentals and client-server architecture, providing the technical grounding necessary to architect robust, scalable front-end web applications.

PROJECTS

Student Management Dashboard CRM | 2026

React | TypeScript | Context API | Appwrite | MUI

- Architected a secure, strongly-typed administrative dashboard utilizing React.js and TypeScript to streamline student data management and operational workflows.
- Engineered comprehensive Role-Based Access Control (RBAC) and strict route protection mechanisms, ensuring secure execution of CRUD operations based on distinct user permission levels.
- Implemented Context API for efficient global state management, seamlessly integrating with Appwrite (BaaS) to handle database interactions and maintain synchronized UI states.

Airline Reservation System & Admin CRM | 2026

Next.js | TypeScript | Redux Toolkit | Tanstack Query | Supabase | Shadcn UI

- Engineered an enterprise-grade flight reservation platform supporting one-way and round-trip bookings, architected with Next.js and TypeScript for high performance and advanced SEO optimization.

- Integrated Tanstack Query and Redux Toolkit to manage complex global state and server-side data fetching, ensuring a seamless, highly responsive user experience during flight searches and payment integration.
- Developed a secure administrative CRM utilizing Role-Based Access Control (RBAC) and Supabase, empowering admins to execute CRUD operations on flight schedules, manage user bookings, and monitor operational analytics like monthly revenue.

SKILLS

- | | | |
|--------------|----------------|------------------|
| • JavaScript | • React.Js | • Redux Toolkit |
| • TypeScript | • Next.Js | • Zustand |
| • Appwrite | • Material UI | • Tanstack Query |
| • Supabase | • Tailwind CSS | • Context API |

WORK EXPERIENCE

Webskitters Academy | October 2025 - Present

Trainee Software Engineer

- Frontend Architecture (Completed): Engineered dynamic, high-performance client-side applications utilizing React.js, Next.js, and TypeScript, while implementing advanced global state management via Redux Toolkit, Zustand, and Context API.
- Performance & SEO Optimization: Architected optimized web platforms leveraging Next.js Server-Side Rendering (SSR) and Static Site Generation (SSG), alongside Tanstack Query for efficient data fetching, caching, and mutation.
- Backend Engineering (Current Focus): Currently architecting scalable RESTful APIs utilizing Node.js and Express.js, with a deep focus on custom middleware design, routing, and environment configuration.
- Database & Security Implementation: Developing secure, data-driven backend systems utilizing MongoDB (CRUD operations and Aggregation Pipelines) and SQL, while implementing robust JWT authentication, password hashing (bcrypt), and Role-Based Access Control (RBAC).
- Advanced Systems & DevOps: Integrating enterprise-level features including Redis caching, real-time WebSockets (Socket.io), file uploads (Multer), and preparing applications for cloud deployment using Docker containerization and CI/CD pipelines.
